Profile Summary

Gaining real-world expertise in software development through academic projects, coding practice, and on-the-job experiences. Possessing a strong aptitude for solving problems and analysing situations, demonstrated throughout academic projects, coding me and practical technical experience. I am flexible and fast learner who is excited to use technical and analytical talents in an entry-level software engineer, web designer, or tech-focused role.

Skills

Programming & Web: Core Java, JavaScript, HTML, CSS, React.js

Data & Analytics: SQL, Power BI, MS Excel, Data Visualization & Reporting

Software Testing: Test Case Design & Execution, Functional Testing, UI/UX Testing, SDLC, STLC, Bug Reporting, JUnit

Tools & Platforms: GitHub, Jira, Zephyr Scale, Trello, IntelliJ IDEA, Firebase, Supabase, Netlify

Currently Learning: Automation Testing (Selenium), Advanced Java, Web Development, WordPress

Professional Experience

Software Testing Intern, PRAM Edu

12/2025 – 02/2026 | Remote

- Over a 60 days period, 30-60 minutes of daily testing was conducted on web/mobile applications for functionality, navigation, and usability.
- I found problems related to functionality, UI, UX and navigation and documented them with clear observations and reproducible steps.
- I prepared and emailed daily testing reports to the team, highlighting defects and usability feedback.

Projects

AI-Powered Smart Virtual Laboratory, Artificial Intelligence

07/2026 – Present

- Creating a system for an AI lab assistant to detect errors as they occurs, explain issues, and provide contextual support to learners.
- I contribute to a faculty monitoring workflow that helps to monitor my progress and completion of experiments in real time.
- Layout of experiment workflow and user interactions to help structure the remote laboratory.
- A detailed analysis of user requirements and system workflows to enhance remote learning, guidance, and evaluation efficiency.

Tech: React.js, MySQL Workbench, AI, Node.js, Remote Lab Access

HappiMoM, Unified Maternal & Reproductive Health Platform

04/2026 – 06/2026

- Developed the web interface and enhanced user workflows using HTML, CSS, JavaScript, and React.js, prioritizing a straightforward and accessible user experience.
- Integrated Supabase for managing application data and used Google Analytics to analyze user interactions.
- Worked on feature logic including menstrual and fertility predictions, growth and milestone mapping, and scheduling notifications and reminders.

Tech: React.js, JavaScript, HTML, CSS, Firebase, Supabase, Google Analytics, Netlify

Academic Performance Analysis System, Data Analytics

02/2026 – 03/2026

- Consolidated academic data from four sections into a structured Excel file, organizing CAT 1 and CAT 2 assessment records for analysis.
- Developed an interactive Power BI dashboard to visualize and compare student performance across subjects and assessments.
- Documented the process of transforming workshop learnings into a functional dashboard and presented the workflow to 60 students.

Tech: Power BI, Excel, Data Visualization & Reporting

Education

BE, Computer Science and Engineering, Mahendra Institute of Technology

10/2023 – 10/2027

CGPA: 9.4 (7th Semester, Ongoing)

Higher Secondary, Nadar Saraswathi Girls Higher Secondary School

06/2022 – 03/2023

Computer Science — 86.5%

SSLC, Nadar Saraswathi Girls Higher Secondary School

06/2020 – 03/2021

State Board of Tamil Nadu-passed

Certifications & Achievements

Top 10 Team (Code Mavericks), InnovHack 2026, GDG on Campus, SASTRA University

Certificate of Appreciation, Cognizant Technoverse Hackathon 2026

The Complete 2026 Software Testing Bootcamp, Udemy, 38.5 hrs

WORKSHOPS & SYMPOSIUMS

AINNOVAT-2K25, National Level Technical Symposium, Department of AI & Data Science, Mahendra Engineering College

ISTE National-Level Technical Symposium, Paper Presentation

Innovations in Data Science & Visualization, Two-Day Workshop, Mahendra Institute of Technology
